

THE SOLUTION TO COLD STORAGE

Air Solutions provides a superior solution to air conditioning and refrigeration techniques by removing the humidity in the air. This eliminates ice and condensation and avoids its reappearance, also ensuring a clean storage environment and optimum working conditions.

Dehumidifiers are the most cost-effective and stress free way to create and maintain your indoor climate. Eliminate humidity issues and control your climate.

INDUSTRIES WHERE AIR SOLUTIONS CAN HELP:

- ▶ MEAT PROCESSING
- ▶ FOOD PROCESSING
- ▶ SUPERMARKETS

TRUSTED BY:

ISSUES CAUSED BY ICE BUILD UP:

- Slippery floors and water puddles.
- High number of defrost cycles.
- High ice accumulation in evaporators and cooling systems.
- Low quality of products due to ice formation on surfaces.
- Detection failures in photoelectric systems.
- Wet or damp packaging.

CONDENSATION CAUSES PROBLEMS LIKE:

- Overhead ceiling condensation causing possible product contamination issues
- Excessive defrost cycles and energy consumption in freezers
- Floor icing or fog causing safety concerns for processing/storeroom employees
- Excessive labour and maintenance costs as a result of frost and icing issues

ADVANTAGES FOR YOU INCLUDE:

- ✔ Coldstore without ice.
- ✔ Reduces the risk of accidents.
- ✔ Maintains the cold chain.
- ✔ Reduces operating costs
- ✔ Improves quality of products stored
- ✔ Removal of air curtains which consume energy
